Incident Report Template

Scenario: Phishing Email Leading to Unauthorized Access

1. Incident Overview

- **Incident ID: 100**
- **Date and time detected: 6/4/2026, 11 AM IST**
- **Reported by: User**
- **Incident type:** Phishing attack
- **Severity level:** High
- **Status:** Open

2. Incident Description:

A phishing email was received by a user, leading to credential compromise and unauthorized access, with suspicious sign-ins.

3. Detection and Analysis:

- **Email details:**
  - Subject: [External] Confidential: Action Required: Please sign and return
  - Sender Address: saaki@owa-shokai.co.jp
  - Recipients: Sandrine.dale@xyz.com
  - Timestamp: 10 AM
- **Indicators of Compromise (IOCs)**
  - Source IP: 20.105.209.72
  - URL/domain: traxvonlight80[.]xyz
  - File hash (if attachment):
- **User Activity:**
  - Users who received the email: 3 users
  - Link clicked: Yes
  - Attachment opened/executed: No

- **Authentication Analysis:**
  - Suspicious sign-in activity: Yes
  - Unauthorized access identified: Yes
- **Endpoint Analysis:**
  - Affected devices (Device IDs): BR4563

4. Impact Assessment:

- **Number of Users Affected: 1**
- **Systems Impacted: 1**
- **Data Exposure: No**
- **Business Impact: None**

5. Containment Actions:

- Blocked malicious IPs/Domains
- Reset password of compromised account
- Removed malicious email from mailboxes

6. Eradication Actions:

- Cleared persistence mechanisms
- Secured compromised credentials
- Eliminated phishing artifacts

7. Recovery Actions:

- Monitored for suspicious activity post-recovery

8. Root Cause Analysis:

- Attack vector: Phishing link
- Cause of compromise: user clicked malicious link, credential theft

9. Lessons Learned

- Identified gaps in:
  - Email security controls
  - User awareness

- Improvements implemented
    - Enhanced phishing detection rules
    - User awareness training
    - Strengthened access controls

10. Recommendations

- Implement stronger email filtering
- Conduct periodic phishing simulations
- Improve monitoring of login anomalies

11. Closure Details:

- Incident Resolution Date: **6/4/2026**
- Resolved By: **B Nandana**
- Final Status: **Closed**
